

NSA's CrossVent™ Arc Flash Hood Arc Flash Protection

Proudly made in the USA.

NOW lighter than ever before with removable fans for ease of laundering!

The **NEW** and improved CrossVent™ Arc Flash Hood designed by National Safety Apparel is now washable and lighter than ever before. Sixteen AA batteries have been replaced with two 9-volt batteries, and the fans are attached with FR hook and loop for ease of removal for laundering the hood.

The innovative CrossVent™ Arc Flash Hood provides a gentle and quiet breeze that keeps you cool and decreases lens fogging.

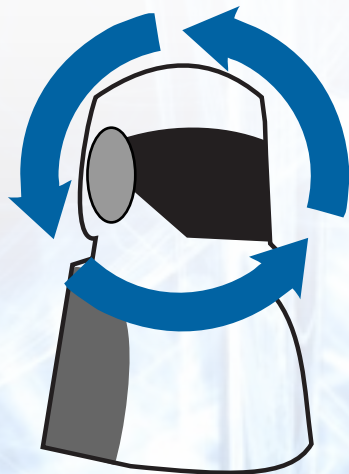

Available with an optional battery operated headlamp that secures to the front of the hood with FR hook and loop.

The hood comes standard in a variety of materials: Choose from Indura Ultra Soft®, Protera™ and Nomex®/Kevlar®.

Removable fans

CrossVent™ Arc Flash Hood Features

Overview

The hood is designed with removable internal fans to keep you cool and to decrease lens fogging.

Benefit

Reduces heat stress by allowing air to circulate for a cooler, more comfortable work atmosphere.

Style

Hood comes standard in multiple materials of your choice. Choose from Indura Ultra Soft®, Protera™ and/or Nomex®/Kevlar®.
